

Integrated Web Based

Aspiration E-Learning Resources

Electronic Learning Resources Management

Electronic Data Storage of Organisational learning resources

Capture, store and categorise learning resources for your organisation on this versatile module designed to organise and make available electronic learning solutions and resources

Learning resources come in a variety of different forms: Examples include books, manuals, e-learning programmes, articles, web sites, MS Word documents, PDF files and formal training programmes. In this module any number of categories can be created to which resources can be linked. Resources are also linked to subject titles that allow for searches by subject. Search words are added for each solution for easy retrieval. The system allows for electronic documents to be opened on line.

Key Benefits

- Keep all Learning Resources in a single easily accessible database
- Find resources quickly with standard search engine capability.
- Electronic Learning Resources can be distributed over a wide area network
- Centralised storage allows for easy maintenance of content
- Resources can be electronically linked to skills (E-Skills module)
- Formal courses loaded in E Training Management module will also display in the E-Learning Resources module
- Promotes use of variety of resources to acquire skills in the organisation

Pre-loaded with
Over 100 resources

Functionality

- Create your own Subject categories e.g. Marketing, Sales Accounts etc.
- Create your own Resource Types e.g. Books, Manuals, Web Sites, E-learning Programmes etc.
- Link resources to subject and type categories
- Multiples linking capability i.e. one resource can be linked to any number of subjects
- Add your own search words to facilitate finding resources
- Link resources to Skills (Units, Outcomes and Assessment checklists) in E-Skills module
