

Skills Tracking & Capability Management

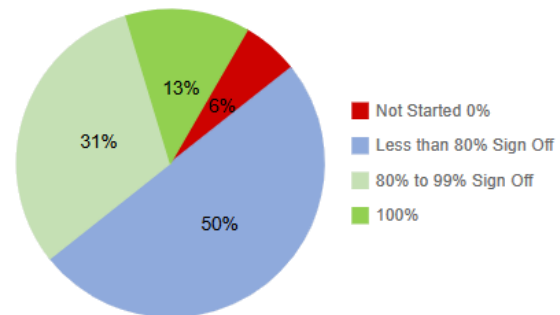

Know Your Workforce Capability—In Real Time

Most capability Management systems fail because they are:

- Static and outdated
- Disconnected from real job requirements
- Difficult to maintain and audit
- Lacking credible assessment evidence

The result?

Skills data becomes unreliable — and unusable for operational and compliance decisions.

Aspiration provides:

A structured, end-to-end skills tracking framework that manages role-based competency requirements, guided assessments, and real-time skills visibility. The platform enables evidence-based evaluations, automated reassessment cycles, and AI-supported learning guidance.

What This Delivers:

Real-Time Skills Visibility

Instant insight into individual and workforce capability across roles, sites, and departments.

Compliance & Audit Readiness

Maintain accurate, auditable records of competence and certification.

Improved Operational Readiness

Ensure employees are competent and authorised to perform critical tasks.

Targeted Skills Development

Identify gaps and link directly to learning pathways and interventions.

Reduced Risk

Minimise operational, safety, and compliance risks through verified competence.

Reduced Administrative Burden

Automated tracking, reassessments, and reporting eliminate manual processes.
